

# JF McKenna Ltd Newsletter

## New products and developments

A lot has been happening within JF McKenna's over the last few months and we are now pleased to announce just some of our developments.

### Cubo

We have brought to the UK and Ireland a revolution in LPHW Heating and Air mixing from Chore-time called "Cubo" Chore-time's CUBO™ Heat Mixer equalizes the house temperature by circulating hot air from the ceiling back to the floor. Its built-in heat exchanger can also add heat to the house. Connection to LPHW is a perfect choice especially from a renewable heating source.

We have teamed with The Collinson Agricultural Division. Renowned for superior quality, all products have been designed and selected to maximize feeding efficiency. Silos, conveyors and feeders are all available as a complete system or individual items, installed or as parts only, the choice is yours.

Collinson have a comprehensive storage range of high quality silos with capacities of up to 40 tonnes. Their range is complimented by flex auger conveyors which together with our Chore-time range can transport the feed to its destination. They have an expansive range of feeders including their renowned spin feeder and with various weighers help to aid feed management.

*"Working together to reduce your energy costs"*

Our Energy saving partner for the UK market have a tailored solution for your farm. Biomass, PV, Solar or wind multiple options but one number.

EcoFit provides the following solutions to commercial markets:

- Site Selection
- Bespoke Solution Development
